PowerView Overview

PowerView

A targeted and personalized communication video for participants that is device responsive, PowerView provides information about their retirement account (balance, employee/employer contributions) with a projected calculation of their savings and monthly payout at retirement. Each participant will also be presented with a unique call to action each time a campaign is sent – for example, with one click, a participant can increase their savings rate to maximize their employer match.

IRIO Overview

IRIO

A retirement income optimizer that can be placed prominently on the participant's home page, IRIO estimates the monthly retirement income based on current contribution rate, portfolio risk and retirement age; offers three options for increasing deferral rates by 1%, 2% and 3% to boost monthly retirement income; and projects the impact of each deferral rate change on retirement income.
